

## Course SLOT formatting instructions

*Schedule for classes*

Day	8:30-9:25	09:30-10:25	10:30-11:25	11:30-12:25	12:30-1:25	02:30-03:25	03:30-4:25	4:30-5:25
Monday	A	N				O		
		B	C	E	G	K	L	I
Tuesday	B	V				W		
		D	C		H	L	J	M
Wednesday	E	P				Q		
		A	D	F	G	K	M	I
Thursday	F	R				S		
		B	C	E	H	L	M	J
Friday	G	T				U		
		A	D	F	H	K	J	I

The Alphabets A to M can be considered as REGULAR slots

The Alphabets N to W can be considered as LAB slots.

DO NOT use any other alphabets than the ones mentioned above.

Note: Slots of each course should be defined in the following way -\n

- 'Alphabet' or
- 'AlphabetNumber' or
- 'AlphabetNumber1Number2' or
- 'AlphabetNumber,AlphabetNumber1Number2'

Example of possible slots =

- A
- B1
- A13
- A12,B13,C2

**Note :**

- To represent the Blank Slot of Tuesday use "X" or "BLANK"  
Example, CYL100 = E1,X,F23 is a **CORRECT** format

- The format 'AlphabetNumber' can be only used when the alphabet belongs to the range = A to M (i.e REGULAR SLOTS)

Example : CS300 = B23 , A1 is CORRECT

- DO NOT add Numbers after an Alphabet belonging to the range = N to W (i.e LAB Slots)  
Example – N12 , V3 etc. are **WRONG (will cause error)**  
(Alternative – to represent a slot like N12 please use B1,C1 instead  
similarly V3 = X )

- Lab Slots are to be represented as a single alphabet of range N to W only  
Example, CS100 = E1,X,N - is a **CORRECT** format  
DS100 = W -is a **CORRECT** format

- Any Words or Alphabets not mentioned in the above points will cause the course to be considered as "NA" course by default.

Example:

CS200 = Backlog - CS200 becomes an NA course

PHL100 = NA - PHL100 becomes an NA course

- When a course has multiple slots they are comma separated.

Example:

CS300 = E1,F2,A23 (This is a CORRECT format)

BUT DO NOT include 'regular/lab slot' and 'NA/unrecognisable slot' BOTH together.

Example :

CS400 = E1 , Backlog . (This is WRONG as E1 is regular but 'Backlog' is unrecognised )

CS500 = B, NA . (This is WRONG as B is regular but 'NA' is NA slot)

( What Actually happens in such cases like slot B,NA is that the course CS500 will get considered as a REGULAR course due to the 'B' slot , but at the same time the course will get considered as an NA course due to the 'NA' slot.

CS500 becomes Regular and NA at the same time which causes an error in the software)

- DO NOT use more than 2 numbers after an alphabet.

Example :

CS200 = A123 is a WRONG format

(instead of A123 , simply use 'A' )

- DO NOT use Numbers Greater than 3

Example:

CS600 = A4 is a WRONG Format (hypothetical example)
